IS INVISALIGN RIGHT FOR YOU?

INVISALIGN ADVANTAGES AND BENEFITS

1 VIRTUALLY INVISIBLE

When you're wearing Invisalign, most people won't even know you're going through treatment, because they are virtually invisible! Get straighter teeth with more confidence – a win/win!

2 REMOVABLE AND EASY TO CLEAN

Unlike braces Invisalign aligners are removable, so it's easy to continue brushing and flossing your teeth the way you normally do. You can even remove them for special occasions and pop them back in when you're ready.

3 EAT WHATEVER YOU WANT

Invisalign is flexible enough to let you live your life the way you want, and eat whenever you want. Just remove the aligner trays and pop them back in when you are finished.

4 STRAIGHTENS YOUR TEETH

Perfect for mild cases of crooked teeth and protruding teeth, or much more difficult dental problems involving serious malocclusion, overbite, or underbite.

Removable. Comfortable. And Nearly Invisible.
